

MASTER CHARACTER IDENTITY & REFERENCE

Permanent AI character reference document — use the visual reference sheet together with the identity description. Identity remains fixed; scene, outfit, pose, camera, lighting and environment may change.

Multi-angle reference: front, 3/4 left, left profile, 3/4 right, right profile, front full body, 3/4 full body, side full body and back full body.

1. MASTER CHARACTER DESCRIPTION

A young Indian man in his early 20s with a naturally masculine, lean-to-average build and moderately broad shoulders. He has medium warm-brown Indian skin with a natural complexion and subtle realistic skin texture. His face has a defined oval-to-oblong structure, moderately strong jawline, slightly angular cheekbones, medium-width forehead, straight proportionate nose, and a defined but natural chin. His facial proportions are balanced and realistic rather than exaggerated or model-like.

He has thick, dense, naturally curly-to-wavy black hair, with short-to-medium length on the sides and noticeably fuller textured volume on top. The hair has a slightly messy, naturally styled appearance with individual curls/waves visible rather than perfectly groomed hair. His eyebrows are naturally thick and dark, with a relatively straight shape.

He has dark brown eyes with a calm, confident expression. His eyes are moderately deep-set and proportionate to his face. He has a naturally defined upper and lower eyelid structure. His nose is straight with a moderately narrow bridge and rounded-natural tip. His lips are medium-sized with a natural shape and slightly fuller lower lip.

He has short, naturally grown black facial hair consisting of a connected beard and moustache. The beard is moderately dense, neatly maintained but not sharply sculpted, following the natural jawline and extending slightly along the cheeks and chin. Keep the facial hair consistent across all images unless explicitly requested otherwise.

His overall appearance should feel like a real young Indian man photographed with a professional camera—not an overly polished fashion model. Preserve realistic pores, subtle facial asymmetry, natural hair strands, realistic beard texture, and authentic human proportions.

His body proportions are natural and athletic-looking without exaggerated muscularity: moderately broad shoulders, average chest, relatively slim waist, proportionate arms, and long-to-average legs. Maintain the same apparent height, body proportions, shoulder width, head-to-body ratio, and overall physique across different images.

His overall visual identity is sophisticated, youthful, confident, understated, and masculine. His presence should communicate quiet confidence rather than an exaggerated smile or aggressive expression.

2. FACE IDENTITY LOCK

IDENTITY LOCK: Young Indian male, early 20s, warm medium-brown skin, oval-oblong face, defined natural jawline, moderately angular cheekbones, straight proportionate nose, thick dark eyebrows, dark brown eyes, medium natural lips, thick black curly-wavy hair with textured volume on top, short-to-medium sides, naturally dense connected black beard and moustache, realistic facial asymmetry, natural skin texture, masculine but youthful appearance, lean-to-average athletic physique, moderately broad shoulders. Preserve exact facial proportions, hair characteristics, beard pattern, skin tone, body proportions, and overall identity across every image.

3. CURRENT FASHION / STYLE REFERENCE

STYLE REFERENCE: Sophisticated contemporary smart-casual menswear. The subject is wearing a light grey tailored blazer with a subtle fine check/grid pattern, structured lapels, two-button front, flap-style welt pockets, and a relatively slim modern fit. Underneath is a slightly relaxed white button-down shirt with the upper buttons naturally open. The shirt is worn casually rather than perfectly tucked or formal. He wears straight/slim black trousers. Accessories include narrow rectangular metal-framed sunglasses with dark lenses and a thin metallic chain necklace with a small pendant. Overall styling is minimalist, youthful, urban, understated, and premium.

4. PHOTOGRAPHY STYLE

PHOTOGRAPHY: High-end realistic editorial street photography, natural outdoor sunlight, realistic camera optics, subtle photographic grain, accurate skin texture, natural shadows, realistic fabric texture, moderate depth of field, sharp subject separation, authentic environmental lighting, slightly warm natural daylight, realistic highlights and shadows, professional DSLR/mirrorless photography, 50mm-85mm portrait lens aesthetic, natural perspective, no artificial beauty-filter appearance.

5. EXPRESSION & BODY LANGUAGE

DEFAULT BODY LANGUAGE: Relaxed and confident posture, shoulders naturally positioned, chest open without exaggeration, arms relaxed, natural hand positioning, subtle masculine presence. Expression is calm and self-assured. Avoid exaggerated posing. Facial expression should remain natural and believable.

Scene variables can change: action, pose, facial expression, location and environment. The underlying physical identity must remain unchanged.

6. PERMANENT IDENTITY NEGATIVE RULES

Do not change the subject's identity. Do not alter facial structure, jawline, nose shape, eye spacing, eyebrow shape, lip proportions, skin tone, hair texture, hairline, beard pattern, body proportions, shoulder width, or apparent age. Do not make him significantly more muscular, thinner, heavier, older, or younger. Do not beautify or excessively smooth the face. Do not create a generic model face. Do not change ethnicity or racial appearance. Do not alter the characteristic curly-wavy black hair or natural beard unless explicitly requested. Preserve realistic human asymmetry and recognizable facial proportions.

8. FINAL GENERATION FORMULA

MASTER CHARACTER IDENTITY + REFERENCE IMAGES + SCENE DESCRIPTION + OUTFIT + POSE / ACTION + CAMERA + LIGHTING + ENVIRONMENT → FINAL IMAGE

Core principle: Identity is immutable; scene variables are mutable. The reference sheet establishes the person's visual identity, while the text blocks establish the persistent physical and stylistic constraints.
